

Program Specific Outcome

1. Graduates of the program will achieve excellence in product design, thermal engineering and manufacturing system by acquiring knowledge in mathematics, science and designing principles.
2. Graduate will be able to analyze, interpret and provide solutions to the real life mechanical engineering problems.
3. An ability to find out, articulate the local industrial problems and solve with the use of Mechanical Engineering tools for realistic outcomes.
4. Design a system and conduct experiments to find suitable solution in the field of mechanical engineering.
5. Identify, visualize, formulate and solve engineering problems in the field of mechanical Engineering.
