Report
Zensar ESD training

Introduction

The Zensar ESD training was conducted for the CS & Entc students of the 2019-20 batch. The training was aimed at enhancing the students' employability skills, and it included the topics such as SQL pl, soft skills, life skills, core Java, and aptitude. A total of 120 hours of training was conducted, and the test for the selection of students was conducted on 30th March 2020. Twenty-five students were selected for the program, and the training started on 9th December 2020.

Training Topics

The program covered an extensive range of topics related to employability skills. The students were trained on SQL pl, which is an essential skill for a database developer. The program also emphasized soft skills, life skills, core Java, and aptitude. Soft skills such as communication, teamwork, and leadership were covered. Life skills such as time management, stress management, and problem-solving were also taught. Core Java was an important part of the training program, which prepared the students for programming jobs. Moreover, the program also offered aptitude training, which is an absolute necessity for cracking job interviews.

Student Feedback

The program was well-received among students, and they provided positive feedback. The students benefitted immensely from the program, and they appreciated the opportunity provided to them by Zensar. The practical approach adopted by the trainers was particularly appreciated by the students.

Faculty Development Program

Apart from student training, Zensar also conducted an FDP for the faculty members of KJCOEMR. The FDP aimed at enhancing the teaching skills of faculty members, specifically in areas related to employability development. The FDP also helped improve the alignment of academic programs with industry requirements.

Conclusion

The Zensar ESD training program proved to be highly effective in enhancing the employability skills of the students. The program covered essential topics such as SQL pl, core Java, soft skills, life skills, and aptitude. The training program helped students prepare for programming and database jobs. The students appreciated the training, and Zensar also conducted an FDP for faculty members. Overall, the program was beneficial for both the students and faculty members of KJCOEMR.
