About program:

This program was organized by **Corporate Social Responsibility Cell & Degree 212 Investment Services & IMF Pvt Ltd.** For Trinity Academy of Engineering teaching and nonteaching faculties. This program aims to provide basics of investment and their ways and benefit's.

In this program we have covered

- 1) **Wealth Management** -Successful Wealth management is an ever changing ideal. It demands an in-depth consultative process that delivers customized solutions across the broad array of financial needs as well as asset classes. We believe that every client is different and view their situation as unique before embarking on the journey to create a roadmap in order to achieve the predefined goals.. Its not just about timing your investments, its also about how much time you give them.
- 2) **Financial Planning**-Financial Planning is the process of meeting your life goals through the proper management of your finances. Life goals can include buying a house, saving for your child's higher education or planning for retirement. The Financial Planning Process consists of six steps that help you take a 'big picture' look at where you are currently. Using these six steps, you can work out where you are now, what you may need in the future and what you must do to reach your goals. The process involves gathering relevant financial information, setting life goals, examining your current financial status and coming up with a strategy or plan for how you can meet your goals given your current situation and future plans.
- 3) **Retirement Planning**- When you start thinking of retirement, you will be asking the big questions to yourself – what does retirement mean to me, and will I have

enough? How can I be better off? As our lives change, our financial needs and priorities change too. Even if you're years away from retiring, you're wise to be thinking about retirement planning.

- 4) Tax Planning** - There is more to tax planning than exemptions available on savings. With our advice, you will pay the right amount of tax, not more and not less. You will also know how to tax proof your incomes and gains. After all, your capital is more productive in your hands and it can work wonders for you if planned properly.

By discussing above concept by **Pravin Budhauriya Vaibhavi , Richa & Priya Raghuvanshi** they aware all people present in program at last Principal Trinity Academy of Engineering Dr. Nilesh Uke Sir done vote of thanks.

Program Outcome:

All attendees got to know the various sources of investment like SIP, FD, TRADING. Got idea about various platform and scheme of investment. Most important things people learn how proper investment is necessary in life.
