

Program outcomes, program specific outcomes and course outcomes for all programs offered by the institution are stated and displayed in website of the institution

Institute has clearly stated and well defined learning outcomes.

Each programme of the college has clearly stated learning outcomes in terms of program outcomes (POs) and course outcomes (COs).

- 1) The PO's define the abilities of the students of that program expected at the time of graduation and Cos are the learning outcomes that the students imbibe at the end of each course.
- 2) For every course/subject separate course objective and outcomes are specified by SPPU, Pune. These are discussed with staff in departmental meetings. These are also reflected in course files.

Program Educational Objectives -

- To Gain the ability to analyze and solve engineering problems through application of fundamental knowledge of mathematics, science, and engineering.
- To understand professional and ethical responsibilities and the impact of engineering towards societal and global context.
- Acquire the background in humanities and social sciences required to be effective as engineers, leaders, and citizens.

Program Outcomes

The graduate is expected to acquire

- The knowledge of engineering mathematics and science.
- An ability to identify, formulate and solve Computational engineering problems.
- An ability to develop projects and their testing and deployment of their system.
- Skill to use modern engineering tools, software and equipment to analyze problems.
- Ability to develop confidence to communicate effectively in both verbal and written form for self-education and lifelong learning.
- Ability to show the understanding and the impact of engineering solutions on the society and also awareness of professional responsibilities and contemporary issues.
- Ability to participate and succeed in competitive examinations in technical field.
